

# STUDY TRIP TO LIEGE

03-05-2022 – 07-05-2022

This document contains a small planning of the trip to Liege. Some things might change a little or will be a bit different, but this is what we will do. We hope to do this together and see you in Liege!

## TUESDAY 03-05-2022

On this first day we will depart from the central station in Nijmegen and travel to Liege by train in the morning. After arrival there will be free time to enjoy and discover the city.

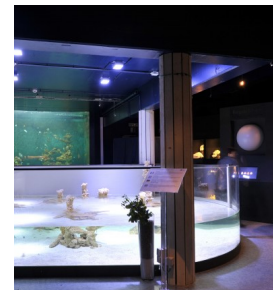

## WEDNESDAY 04-05-2022

This day we will visit the biomedical engineering department of the University of Liege.

## THURSDAY 05-05-2022

On this Thursday we will enjoy the culture and biological history of Liege. We will do this by visiting the Aquarium-Museum of the University of Liege. This is a museum with many (around 20.000) stuffed animals and skeletons next to multiple aquariums.

## FRIDAY 06-05-2022

Friday we will visit a botanical garden in Liege. It has many greenhouses, some built in 1840. They contain nearly 5000 plants and in the park surrounding them there are more than 170 species of trees. In the evening there will be a surprise activity!

## SATURDAY 03-05-2022

In the morning there will be free time to take one last look and walk in the city. In the afternoon of this day we will take the train back to Nijmegen.
